DOCUMENT SERIES

This is Document 2 of 9 in the My Remote Project Manager Scope Management Toolkit.
Use alongside the Scope Planning Checklist and other toolkit documents.

How to Use This Template

ABOUT THIS TEMPLATE

This template presents a prioritization technique that categorizes project requirements providing a structured approach with focus, flexibility, and control over benefits, resource allocation, stakeholder alignment, and change management.

WHAT IT DOES

- Categorizes requirements into Must Have, Should Have, Could Have, and Won't Have
- Identifies and clarifies critical elements and resources for the project
- Engages and manages stakeholders by aligning expectations on priorities
- Evaluates proposed changes against MoSCoW categories during impact assessments
- Reduces risk of unnecessary changes and scope creep throughout the project
- Maintains control while allowing flexibility for lower-priority requirements

HOW TO USE

Work through each page in sequence. Gather your project stakeholders, list all known requirements, and assign each a MoSCoW priority. Use the Analysis Table to record requirements, the Prioritization Matrix for a visual summary, and the Out of Scope page to formally capture exclusions. Obtain stakeholder sign-off on the final page.

SCOPE MANAGEMENT TOOLKIT SERIES – Document 2 of 9
