

# SCOPE PLANNING CHECKLIST

Interactive Fillable PDF

## Plan Scope Management Process

The products of this process are the development of the scope management and requirements management plans.

| Documents & Data to Gather                                  | Products                                              |
|-------------------------------------------------------------|-------------------------------------------------------|
| <input type="checkbox"/> Project charter                    | <input type="checkbox"/> Scope management plan        |
| <input type="checkbox"/> Project management plan components | <input type="checkbox"/> Requirements management plan |
| <input type="checkbox"/> Quality management plan            |                                                       |
| <input type="checkbox"/> Project life cycle description     |                                                       |
| <input type="checkbox"/> Development approach               |                                                       |
| <input type="checkbox"/> Enterprise environmental factors   |                                                       |
| <input type="checkbox"/> Organizational process assets      |                                                       |

## Collect Requirements Process

The products of this process are the requirements documentation and requirements traceability matrix.

| Documents & Data to Gather                                  | Products                                                  |
|-------------------------------------------------------------|-----------------------------------------------------------|
| <input type="checkbox"/> Project charter                    | <input type="checkbox"/> Requirements documentation       |
| <input type="checkbox"/> Project management plan components | <input type="checkbox"/> Requirements traceability matrix |
| <input type="checkbox"/> Scope management plan              |                                                           |
| <input type="checkbox"/> Requirements management plan       |                                                           |
| <input type="checkbox"/> Stakeholder management plan        |                                                           |
| <input type="checkbox"/> Project documents                  |                                                           |
| <input type="checkbox"/> Assumption log                     |                                                           |
| <input type="checkbox"/> Lessons learned register           |                                                           |
| <input type="checkbox"/> Stakeholder register               |                                                           |
| <input type="checkbox"/> Business documents                 |                                                           |
| <input type="checkbox"/> Business case                      |                                                           |
| <input type="checkbox"/> Agreements                         |                                                           |
| <input type="checkbox"/> Enterprise environmental factors   |                                                           |
| <input type="checkbox"/> Organizational process assets      |                                                           |

## Define Scope Process

The products of this process are project scope statement and updates to project documents.

### Documents & Data to Gather

- ☐ Project charter
- ☐ Scope management plan
- ☐ Project documents
- ☐ Assumption log
- ☐ Requirements documentation
- ☐ Risk register
- ☐ Enterprise environmental factors
- ☐ Organizational process assets

### Products

- ☐ Project scope statement
- ☐ Project documents updates
- ☐ Assumption log
- ☐ Requirements documentation
- ☐ Requirements traceability matrix
- ☐ Stakeholder register

## Create WBS Process

The products of this process are a scope baseline and updates to project documents.

| Documents & Data to Gather                                | Products                                            |
|-----------------------------------------------------------|-----------------------------------------------------|
| <input type="checkbox"/> Scope management plan            | <input type="checkbox"/> Scope baseline             |
| <input type="checkbox"/> Project documents                | <input type="checkbox"/> Project documents updates  |
| <input type="checkbox"/> Project scope statement          | <input type="checkbox"/> Assumption log             |
| <input type="checkbox"/> Requirements documentation       | <input type="checkbox"/> Requirements documentation |
| <input type="checkbox"/> Enterprise environmental factors |                                                     |
| <input type="checkbox"/> Organizational process assets    |                                                     |

## Validate Scope Process

The products of this process are accepted deliverables, work performance information, change requests and updates to project documents.

### Documents & Data to Gather

- ☐ Project management plan components
- ☐ Scope management plan
- ☐ Requirements management plan
- ☐ Project documents
- ☐ Requirements documentation
- ☐ Requirements traceability matrix
- ☐ Verified deliverables
- ☐ Work performance data

### Products

- ☐ Accepted deliverables
- ☐ Work performance information
- ☐ Change requests
- ☐ Project documents updates
- ☐ Lessons learned register
- ☐ Requirements documentation
- ☐ Requirements traceability matrix

## Control Scope Process

The products of this process are work performance information, the project management plan and project documents.

### Documents & Data to Gather

- ☐ Project management plan components
- ☐ Scope management plan
- ☐ Requirements management plan
- ☐ Change management plan
- ☐ Configuration management plan
- ☐ Baselines
- ☐ Scope baseline
- ☐ Performance measurement baseline
- ☐ Project documents
- ☐ Lessons learned register
- ☐ Requirements documentation
- ☐ Requirements traceability matrix
- ☐ Work performance data
- ☐ Organizational process assets

### Products

- ☐ Work performance information
- ☐ Change requests
- ☐ Project management plan updates
- ☐ Scope baseline
- ☐ Schedule baseline
- ☐ Cost baseline
- ☐ Performance measurement baseline
- ☐ Project documents updates
- ☐ Lessons learned register
- ☐ Requirements documentation
- ☐ Requirements traceability matrix
